

Big insurance companies have created a health care system that costs too much, covers too few and excludes too many. Workers often have to sacrifice needed pay increases to keep their health care benefits.

Health Care Reform

CAN'T WAIT

Health care reform helps ALL working families—including building trades members with strong union health insurance plans.

■ **We can finally bring down health care costs.**

By capping out-of-pocket expenses, deductibles and co-pays, we can finally rein in health care costs for everyone.

■ **Health care will be there for you, no matter what.**

You can keep your union health insurance plan. Health care reform—including a strong public option—will be there to cover you if you lose your job, get sick or retire.

■ **Your doctor will be able to take better care of you.**

Insurance companies won't be able to tell your doctor what to do anymore. And insurance companies will be required to fully cover regular checkups and tests to keep you healthy—without charge.

■ **It will level the playing field for doing business.**

By requiring companies to pay their fair share for care, health care reform will allow companies with good union health benefits to compete equally for contracts with companies that don't provide health insurance.
